

To Whom it may concern,

It is a displeasure to hear you are trying to limit XM Radios programming. I rely on the Traffic channel as I drive 140 miles round trip to work. This service they offer is better than any other traffic and weather service there is. I also think XM Radio makes driving safer. Remember there are stations with no commercials. Most people will take their eyes off the road to change stations, also their arm will be extended away from the wheel. Clearly XM Radio makes our roads a safer place. It also keeps people informed on what's going on on the roads. I plead to you the FCC to leave XM alone.
